

PROJECT: PLASTIC OMNIUM AUTOMOTIVE EXTERIORS

LOCATION: ANDERSON, SOUTH CAROLINA

AIR PERMITTING AND COMPLIANCE ASSISTANCE

Objective: Assist the company in obtaining construction permits in timely manner to accommodate construction schedules. Assist the company with defining requirements for compliance with the Plastic Parts Manufacturing National Emission Standards for Hazardous Air Pollutants regulations and assist with identified task completion.

Summary: Prepared construction permit applications for two new automotive parts painting operations, installation of a regenerative thermal oxidizer and prepared exemption requests and informational letters for exempt equipment. Prepared revised Title V permit application to include second painting operation. Provided technical staff on-site for approximately ten weeks to assist with construction permit application preparation and identification and resolution of technical corrections to construction permits for prior equipment installations.

Deliverables: Construction and Operating permit applications, Title V operating permit application and various construction permits.

Results: Developed and implemented compliance strategy, prepared miscellaneous construction applications, and modeled facility for air toxics.
